SUMMARY

Cybersecurity student with hands-on SOC experience in SIEM, malware analysis, and security automation. Skilled in Linux, network hardening, and incident response using tools like Wazuh, pfSense, Cuckoo, and n8n. Eager to apply technical skills to real-world security challenges and strengthen organizational defense.

EDUCATION

Bachelor in Cyber Security | Air University Islamabad

Sept 2024-Sept 2028

- CGPA: 2.74/3.00

FSc Pre-Medical | Punjab College

2022-2023

EXPERIENCE

SOC Analyst Intern | ITSOLERA Pvt Ltd (Team ZETA)

(Jan 2026 – Mar 2026)

- Deployed Wazuh SIEM with File Integrity Monitoring, integrated firewall (UFW/iptables) logs, and implemented network hardening techniques including geo-blocking and restricted administrative access to enhance system security and monitoring visibility
- Conducted malware analysis (WannaCry) using static and dynamic techniques, built an isolated lab with pfSense, automated analysis using Cuckoo Sandbox, and developed SOAR workflows with n8n for real-time alerting and incident response

TECHNICAL SKILLS

- **Systems:** Windows, Linux (Ubuntu)
- **Networking:** TCP/IP, OSI, Routing & Switching, Firewalls, Network Hardening
- **Programming:** Python, C/C++, Java. Assembly language
- **Security:** SIEM (Wazuh), Incident Response, Malware Analysis, Digital Forensics,
- **Tools:** Wireshark, Nmap, pfSense, Cuckoo Sandbox, n8n, VMware, Packet Tracer, PRTG
- **Version Control:** Git/GitHub for project collaboration

PROJECTS

DSA Flight Management System

- Implements flight booking, searching, and history management with proper data handling.
- **Tools Used:** C++, Arrays & Structures, Loops & Conditional Statements, File Handling

PhishGuard – Interactive Phishing Defense Training Tool

- Simulates phishing attacks to train users in recognizing threats.
- **Tools Used:** Python, Linux/Ubuntu, Security Awareness Simulation

RAMTRAP – Anti-Malware Honeypot in Memory

- Detects and analyzes malware in memory in real-time.
- **Tools Used:** C++, Memory Forensics

ChatSecure – Encrypted Client-Server Chat Application

- Provides secure, encrypted messaging between client and server.
- **Tools Used:** Socket Programming, Encryption

Travel Itinerary Plan

- Creates and manages personalized travel plans with destinations, dates, and activities.
- **Tools Used:** C++, Arrays & Structures, Console-based Application

CERTIFICATIONS

Certified Fundamentals in Cybersecurity Fortinet	Dec 2025-Dec 2027
Python Essential 1 Cisco Networking Academy	Dec 2025
Networking Basics Cisco Networking Academy	Dec 2025
Introduction to Critical Infrastructure Protection OPSWAT	Dec 2025-Dec 2026
